

INCREASING THE SKIN-MOISTURIZING PROPERTIES OF POLYOLS

Abstract of the Disclosure

The present invention is a cosmetic or dermatological formulation, comprising
5 iminodisuccinic acid or a salt thereof and a polyol, and a method of applying same to
the skin to moisturize the skin. The present invention also includes methods of
increasing the skin-moisturizing properties of polyols by using iminodisuccinic acid or a
salt thereof.
